ENGLISH

This term in English we have been reading some really interesting recounts of life in Australia back in the old days (1950s-1960s). We are working towards writing our own recounts using language that gives people a sense of the place and time we live in.

We have been learning to write interesting and different types of sentences. Do you know the difference between a coordinating conjunction and a subordinating conjunction? Ask your kids what FAN BOYS means!

We have been learning a number of reading comprehension strategies to help us understand what we read. We took advantage of the lovely weather to do some peer reading!

SPORT

At the end of last term, some of our students joined with our other Caffey schools to play in a soccer carnival. The students had a great day.
SOSE and SCIENCE

We have been busy researching exploring in SOSE and Science. In SOSE we are investigating the question “Who discovered Australia?” In Science we are exploring Space. Our school laptops are great for doing research!

We are developing a love of learning and think school is a great place!
