Wow ... where has the term gone? I cannot believe we are at the end of week 7 already. There has been lots of learning happening in the Prep/1 classroom with students working very hard on retelling events and experiences with both their peers and known adults. They have been focusing on retelling one to two events from selected stories or events and drawing their responses in their scrapbooks as well as discussing these in small group and whole group situations.
Our excursion to The Floating Café

Yesterday was our much anticipated excursion to the local café – The Floating Café. In the morning session we all walked down from school to the café. When we got there, we chose where we would like to sit and waited until our names were called out for us to go up and order what flavour milkshake we would like. Chocolate and strawberry were definitely the most popular! Once all of our orders were placed and our money was paid, the milkshakes and yummy treats were brought out. We could choose between lamingtons, passionfruit tarts or caramel tarts. It was all so delicious and we had the most wonderful time!
After we left the café we were lucky enough to have a quick play in the park.

What a big morning!

Back to school!
To assist with an activity that we will be completing in class, I ask you to please send along a copy of a family photo with your child. Alternatively, if you do not have any photos printed, feel free to email an electronic copy of your photo to kfitz100@eq.edu.au. Please ensure these photos are sent in by the end of next week!!!!

In Science students have been focusing on how the senses can help us learn about the world around us. We have also been discussing the difference between living and non-living things. Last week we received a
letter from our friend Gumnut asking us to help some of his friends around the school. We used our sense of sight to search for his friends.

**Marvellous Maths . . .**

In maths we have been working through a number of different concepts including patterns and number. Students have made a range of different patterns including music patterns, movement patterns, drawing patterns and patterns using different objects from around the classroom. Students have also been working on number recognition (numbers 10-20) and different ways those numbers can be represented.
Save the date!

Parents, please ensure you keep the morning of **Tuesday the 21st March** free as there will be something exciting happening in the P/1 room. A special invitation will be coming home soon!

Kathleen Fitzpatrick 😊

Who knew learning could be so much fun!?
